TIPS AND IDEAS

(Researched and written by Chris Sanderson)

Fridge problems – Ignition The first time I went to use my own fridge on gas this season, the 12 volt spark ignition would not work i.e. having switched to gas the indicator light didn't flash and the spark igniter was silent. On investigating through the fridge vents on the caravan outer wall, moving one of the cable forms resulted in the igniter springing into life. Further investigation found a four-way multi plug/socket at the back of the cupboard next to the fridge was almost apart. I simply clicked the two halves back together and no problems since..
