

SUFFOLK CENTRE

TIPS AND IDEAS

(Researched and written by Neil Carter)

Aquarolls – Day to Day Use

When filling up your Aquaroll using a small piece of hose. How about fitting on one end a Koselok tap connection.

The majority of stand pipes fitted with taps have the screw connection built into the tap. Simply attach your hose and presto, no more wet feet.

Aquaroll Handles – Slide a length of 15mm pipe insulation over the handle. No more cold fingers or possible dents in your caravan.
