

ADVICE FOR USE OF GAS TEA URNS

The SCCC Equipment Officer has received a number of questions about the safety and use of our Gas Tea Urns.

- Gas Tea Urns can be used indoors or out doors
- Do not site within 3 feet of curtains, awnings, gazebos, wind breaks etc due to fire risk
- Instructions for lighting:
 1. Ensure gas bottle is securely fastened using a gas spanner
 2. Place the Gas Tea Urn on level ground (avoid grass or flammable surfaces)
 3. Fill the Urn with Water
 4. **Important** - Turn gas on and pass lighter or match through square lighting hole at arms length, keeping your face back from flame area. Please note that lighters that produce a spark often cause the gas flame to “blow back”. Therefore use a flame for lighting the URN.
 5. When finished, switch off gas and allow Urn to cool. Remove water before moving Urn.
